

INSPECTION CHECKLIST

Outdoor

GENERAL SANITATION EVALUATION:

YES **NO**

- Trash areas clean and well maintained to deny rodents food
- Wood stacked and stored directly next to the foundation providing rodent habitat
- Foundation areas free of clutter/trash that might attract rodents
- Exterior dog pens providing rodents and wildlife food
- Birdfeeders maintained to prevent attracting rodents

RODENT PROOFING & EXCLUSION:

YES **NO**

- Gaps greater than 1/4 in at siding-foundation junction
- Roof shingles damaged or missing that allow rodent entry
- Vinyl or rubber roofing form continuous seal; no holes
- Tree limbs at least 6 ft back from roof areas
- Other landscape plants providing access to the roofs (vines)
- Soffit vents present and screened
- “Smudge marks” from rodents accessing attic through gaps
- Electrical service, telephone, cable openings in the siding sealed
- For door: threshold seal present, proper fit, good condition
- Weather stripping at garage door-floor & door-trim injunctions
- Basement windows cracked or missing
